Hi Gawtam,

I understand the situation. Please let me know a time we can meet over google meet tomorrow possibly. I will try to plan your works online.

Thanks for informing me.

Regards,
Niyas A

Respected Sir,

I had an emergency at home, so I was unable to work from yesterday and couldn't return your call. Sorry, I should have informed you before.

Regarding the internship, I've gathered the following [data](#) regarding the required stereo cameras and LIDARs. I've taken into consideration the facts like documentation, support, and compatibility with ROS that are best for path planning and obstacle avoidance.

Also, would it be possible to continue the internship online until July 15th, as I have to visit my grandparents in my hometown in Kerala, and I won't be at IITM till then. I'm really sorry for the sudden information.

My sincere apologies for not responding on time.
