Dear C R Gawtham,

Congratulations!

We are pleased to inform you of your selection into the prestigious IITM Young Research Fellow program. You have come through both rounds of selection with flying colours and we are happy and proud to welcome you into the IITM YRF 2021 cohort.

You will be working on the project "Offline And Online Motion Planning, Guidance And Control of Autonomous Vehicles"

Under the guidance of Dr. Satadal Ghosh. The faculty mentors are cc-ed in this email and we request you to reach out immediately to them and set up a meeting to discuss first steps.

As the second batch of YRF, you have a unique responsibility - you have to showcase the sustained strength of and appetite for undergraduate research at IIT Madras! We hope that you will work hard, think hard, and have a great and fulfilling year in this program, and contribute to its continued success.

The IITM YRF was nucleated by the IITM alumni batch of 1979, who are also involved in the program in various ways along with the IITM campus team. There are a few changes in the program compared to last year - one pertains to registering for URP credits & the monthly honorarium, and the other is of course the involvement of industry partners. Aside from that, the stories you likely heard from your seniors batch will be mostly true. We meet weekly for some research readiness classes, we expect you to meet your faculty mentors regularly, we want you to read and get on top of the appropriate literature, and so on.

The YRF team will soon write to you for a formal online meeting to launch the program, where we will talk about the above, meanwhile please reach out to the faculty and get started on your exciting research journey asap! Please don't hesitate to address any queries to yrf@smail.iitm.ac.in (usually accessed by Prof Preeti Aghalayam) and yrfadmin@smail.iitm.ac.in (Ms Sumani)
